

# ENVIRONMENTAL POLICY

# COMPLETE AVIATION

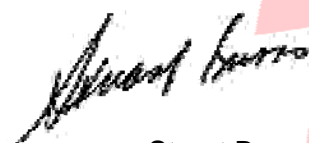

Complete Aviation Management recognises that it has a responsibility to the environment beyond legal and regulatory requirements.

We are committed to reducing our Environmental impact footprint and continuously improving our Environmental performance as an integral section of our operating methods and business strategy.

We will encourage our customers and suppliers and other stakeholders to that same degree.

Complete Aviation Management will endeavour to:

- Use Aircraft Maintenance Engineering and Operations best practice to minimise our impact on the environment;
- Maintain all equipment consistent with the latest revisions of manufacture's data
- Operate our Aircraft fleet in a manner consistent with our environmental principles
- Continuously involve all staff in the education and review process.
